Looking Backwards And Forward: Did Trump Just Trigger The WEF's "Great Reset"?

The World Economic Forum is, and has always been, the home of the “Great Reset”. Klaus Schwab wrote a book about it in 2019. After that, a slew of books with the same appeared, by the likes of Glenn Beck, Mark Morano, Michael Rectenwald, Clay Clark, and Jacob Norgangard, among others. The Great Reset has been sliced and diced ad infinitum. Some will be proved right, and others will be proved wrong.

But after Donald Trump’s stunning, hammering speech at the World Economic Forum this morning, it is evident that Trump is the catalyst to trigger the Great Reset. In other words, this spells the end of the “New Old World Order.” Few saw this coming in this way, but Trump has thrown them all under the bus:

- The United Nations, Agenda 21, and its Sustainable Development scam
- The windmills and solar farms
- The war on carbon and fossil fuels
- Stakeholder Capitalism
- The “stupid” immigration policies that are destroying Europe
- NATO
- etc., etc.

My read at this point is that all of these things were instrumental in getting Technocracy in the driver’s seat in the first place. But now that Technocracy has arrived, they are done with those things. Out with the old, in with the new.

With the world order in shambles, don’t look back. Look forward to what the next world order will be.

The only possibility is Technocracy, and we see it all around us.
